

Cyberoam Forms Distributor Partnership with Avajang System of Iran

Cyberoam forms strategic partnership with Avajang System for distribution of Cyberoam security appliances in Iran

Ahmedabad, Gujarat, IND, 2007-02-06 07:00:00 (IndiaPRwire.com)

Cyberoam, the makers of Identity-based Unified Threat Management (UTM) Appliances today announced the formation of a strategic partnership with Avajang System for distribution of Cyberoam security appliances in Iran.

A division of the respected Avajang ICT Group, a leading name in the Middle-East and Iranian IT market, Avajang System forms a key contributor to Cyberoam's expected \$ 1 Million revenue from the Middle-East and Iranian markets.

Avajang System provides a host of services to its clients, including security solutions, IT consultancy, IT training and ID Automation amidst other services.

Expressing his happiness over this important alliance with Avajang System, Harish Chib, VP-New Business Development, Cyberoam said, 'At Cyberoam we are focusing on expanding exponentially in the international Internet security market. The partnership with Avajang System is an important step towards this goal. With this partnership Cyberoam shall attain an important share in Iran which is emerging as a growing market for Internet security appliances.'

Commenting on the tie-up with Cyberoam, Mohammad Moabsseri, Director - ICT Security, said, 'Avajang System and the Avajang ICT group per se, has been a proud distributor of IT related services and solutions from reputed companies. Our partnership with Cyberoam is based on its strong and unique Identity-based UTM appliances which offer comprehensive security to corporations while addressing emerging threats.'

Cyberoam offers protection against a range of Internet threats, including viruses, worms, Trojans, spyware, phishing, pharming and more. It delivers the complete range of security features such as Identity-based firewall, VPN, Gateway Anti-virus, Gateway Anti-spam, Intrusion Detection and Prevention, content filtering, in addition to bandwidth management and multiple link management over a single platform.

Cyberoam offers complete Internet security to over 1000 enterprises globally; institutions which have been using Cyberoam appliances to their benefit include educational institutions, corporations, and government organizations.
