Niemann and CIOs and Chief Architects of various companies like DHL, Credit Suisse, EDS, British Telecom, Compuware, NIC, Microsoft, Citigroup, Reliance, Perot Systems, HSBC, iCMG, Accenture, etc., for more information on the summit visit [www.architecturesummit.com](http://www.architecturesummit.com). The key focus areas of the conference will include understanding of EAF (Enterprise Architecture Frameworks), Model Driven Architecture (MDA), Component based product line, Service-oriented Architecture (SOA), ITSM etc. which are key for the End-User Companies for reducing IT costs, ensuring system longevity and enhancing productivity.*

Bangalore, Karnataka, IND, 2007-05-25 12:31:13 (IndiaPRwire.com)

In the world of Information Technology and Software development, Software Architecture is one of the most critical elements for realizing practical vision of any IT system, especially for Global leaders and Fortune 2000 companies. Towards enabling companies to realize that vision and to put India in the forefront as a leading center for IT Architecture, Bangalore based iCMG - an IT Architecture services and solutions company is organizing the 2nd edition of 'Architecture World 2007' - an international conference on Enterprise Architecture, scheduled on the 27th and 28th June, 2007 at the TATA Auditorium in IISc., campus. The conference will see 28 Architecture sessions by 25 speakers from 16 countries. The speakers are the thought leaders in the industry including Mark McGregor, Klaus D. Niemann and CIOs and Chief Architects of various companies like DHL, Credit Suisse, EDS, British Telecom, Compuware, NIC, Microsoft, Citigroup, Reliance, Perot Systems, HSBC, iCMG, Accenture, etc., for more information on the summit visit [www.architecturesummit.com](http://www.architecturesummit.com).

'We realized that professionals from the Software Architecture needed a common platform to congregate and share thoughts, ideas, expertise and explore synergies across the globe. The response from the 1st edition was so overwhelming that we decided to make this an annual event. The two days summit is expected to see 450 - 500 architects from world over. The summit is a perfect gathering of Industry Thought Leaders, Book authors, Practitioners, Coach and Mentors. This conference will provide an opportunity to the architects, program managers, CIOs and CTOs to share knowledge of innovative software architecture, which represents the next generation of practice for leading technologists in the software discipline.' says **Sunil Dutt Jha, Practicing Architect & CEO of iCMG, a technology leader in Middleware Software.**

The Architecture World conference will be an exclusive gathering among the Indian architect community under one roof. The summit will carry an objective to address upon Indian software architecture issues. The event will be attended by some of the most influential IT architects in India. The summit is supported by International Association of Software Architects, Global Enterprise Architecture Organisation, Association of Enterprise Architects and World-wide Institute of Software Architects.

The key focus areas of the conference will include understanding of EAF (Enterprise Architecture Frameworks), Model Driven Architecture (MDA), Component based product line, Service-oriented Architecture (SOA), ITSM etc. which are key for the End-User Companies for reducing IT costs, ensuring system longevity and enhancing productivity.

- END -

**About iCMG:**

iCMG is a fast growing IT architecture firm which provides a combination of tools, solutions and services catering to the entire architecture needs for an enterprise. iCMG's products include K2 Component Server (first generation of component-based middleware supporting software ports and assembly) for building composite applications based on components and services, either abstracted from existing applications provided by the platform, or from an external source. These products and solutions are designed to support high performance, component middleware product in domains such as Aerospace/Defence, Telecom/Wireless, Energy and Power, Banking/Finance and Manufacturing.
