

How Knowledge Management can make your Educational Institutes e-literate

cyn.in releases a comprehensive document on how Knowledge Management can help Educational Institutes achieve optimum standards in the educational domain. It lists what requirements a KM must fulfill to satisfactorily manage all the Knowledge Management requirements of an Educational Institutes.

Wilmington, DE, GBR, 2007-06-26 18:19:18 (IndiaPRwire.com)

Leading education organizations around the world are focused on the concept of sustainable improvement. The primary goal is to create an environment that delivers better learning. The improvement drive is powered from within the organization and also from government bodies that fund the organization.

Educational Institutions also need to tackle challenges of outdated teaching techniques, falling student registrations and reduced expenditure budgets.

A common theme that runs through all strategies for improvement is enhanced communication and collaboration between the important stakeholders groups in the education environment - students, alumni and parents, administrators and teachers. To enable such changes it is essential they create a robust collaborative Knowledge Management system which will be the propelling force that will help them achieve their goals.

cyn.in is a comprehensive and powerful collaboration and content management platform that is a perfect fit for Educational Institutes due to its simplicity, cost-effectiveness, intuitive features, web-based functionality and scalability. cyn.in enables Educational Institutes to harness knowledge in better and productive ways.

To know more on how cyn.in can help schools, universities and other educational institutes to enable collaboration and manage their knowledge better download the PDF here:
<http://blog.cyn.in/Note/3774/index.html>.

The document explains the points mentioned below in a detailed manner.

Benefits for an Educational Institute in adopting cyn.in as a KM solution Timely and effective collaboration on curriculum development Sharing of teaching best practices for benefit of organization Better online tools for managing daily information sharing between students & teachers Effective monitoring of students over several years and different teachers Effective communication with parents for communicating ward progress

Requirements and Challenges of an Educational Institute Flexibility and choice of computers should be possible as different platforms are used The communication and collaborative solution should run on all versions of OS User mobility should be possible as users change locations frequently Manage long list of priorities with limited budgets Manage the infrastructure with limited IT staff

The document also describes the typical educational functions and processes that can be simplified and improved upon with the help of cyn.in.

- END -
