

Big Screens to the small Third Screen of Mobile Phones

The tiny mobile screen is set to help the big screen cinema halls by providing anywhere, anytime information on movies. mVies.in is a mobile solution that provides the most accurate movie information on Mobile Phones.

Bangalore, Karnatka, IND, 2007-07-28 13:25:22 (IndiaPRwire.com)

mobiSolv, the company behind <http://mvies.in> mobile application today announced the availability of their application for Bangalore. mVies.in is a mobile solution that provides the most accurate movie information on Mobile Phones. Earlier the application covered only Delhi and Mumbai, but now it would also cover **Bangalore**, the silicon valley of India.

It is widely known that Bollywood has been seeing sagging revenues for some time because of various reasons. **mVies.in** tries to improve the situation by providing movie related information at all times and in the hand of the users.

The application is a boon for movie buffs who want movie related information and have earlier resorted to newspaper and phone calls. **mVies.in** provides all the movie show timings and cinema hall information right on your mobile phone. It even allows you to make phone calls for reservation without typing the phone number. This **Click-to-Call** feature has been appreciated by its patrons since the beginning.

mVies.in strives to provide the most accurate information about movies which is still not available in most other movie related offerings. Another
