

Kaya Skin Clinic uncovers its Skin Lightening Service

This festive season, get used to being complimented! But to look your best then, start now! A little care and concern can get you back your original skin, fairer and prettier. Get back your original skin colour back as you look visibly lighter with the all-new Kaya Skin Lightening Solution. The Skin Lightening Solution, a 30-day time bound solution, is a combination of a specialized service and products that ensure a beneficial difference to your skin, thereby giving back your natural skin tone. You were born with gorgeous smooth skin.... Now get it back with Kaya Skin Lightening!!

Mumbai, Maharashtra, IND, 2007-10-16 16:19:35 (IndiaPRwire.com)

Ever wondered why our skin doesn't remain the way it was when we were young? Or whether we looked fairer in our childhood photographs? Daily exposure to the sun, faulty eating habits and careless skincare routines often contribute heavily towards making your skin look dull, lifeless and often, darker than your original colour. Now, boast of a perfectly even-toned skin as **Kaya Skin Clinic** presents **Skin Lightening**, a unique specialised treatment to regain the texture and fairness of your natural skin tone.

A clinically tested solution designed by the collective expertise of over 120 dermatologists at Kaya Skin Clinic, **Skin Lightening**, a 30-day time bound solution, is a combination of a specialized service and products that ensure a beneficial difference to your skin, thereby giving back your natural skin tone.

Commencing with the application of a unique formulation of fruit fatty acid peel (*alpha and beta hydroxy acids*) to ensure uniform regeneration of the skin, in the first step, a specialized combination of Retinaldehyde (*smoothens the skin texture*), three skin lightening agents (*blocks the melanin formation*) and vitamin C (*works as an anti-oxidant for skin repair*) is applied in step 2. A proper home care regime to nourish and protect the fresh new skin is important to maintain the glow, post the treatment.

It will then be no wonder, if after the first few sessions, you will see visible lightening and de-tanning of the skin due to stimulation of skin regeneration, as Skin Lightening prevents further darkening to deliver an even toned, softer, smoother and clearer skin for that increased glow.

The Skin Lightening service, combined with exclusive **Kaya products**, results in the visible lightening of the skin and stimulates skin regeneration wherein the old damaged skin is replaced by fresh and bright skin. It is very efficacious in cases of hyper pigmentation of the skin. The experience leaves your skin lighter, softer and smoother, one that glows like the beauty of a newborn baby. Diligent after care with the regular use of daily sunscreen and moisturizer, will protect your skin and maintain that inner glow.

A little personal attention won't do you harm…after all, all's *fair*.
