

Medical Equipment Rental Services- "MEDIRENT" Launched for the FIRST TIME IN INDIA

Through Medi rent services, instead of buying, one can hire expensive medical equipment on rent for home use such as Hospital Beds, Ripple Bed (Air Mattress), Oxygen Concentrator, Oxygen cylinder, C-PAP, Bi-PAP, Suction Machine, Wheel Chairs, Nebulizer, Walkers, Crutches, Bed Pans, Commode Chairs, BP Apparatus, etc." The Rental Service starts from Rs. 20/=onwards and further depends on the medical equipment .

New Delhi, Delhi, IND, 2007-10-17 15:30:53 (IndiaPRwire.com)

Medical science has taken a vast leap for the benefit of mankind. As a result, life expectancy has increased across the globe. But, is it due to developments in medical science only? The answer is 'NO'. It has been complemented by advances in 'care giving' techniques. Medical Science can save the patient's life but proper care can lead to increase the Quality Of Life of entire family & some of them might save the patients from any unforeseen critical situations. These critical conditions can often prove fatal for the patient.

There are various conditions where specialized equipments can make life easier but the equipment is often expensive & needed for a few days or weeks thus buying it does not make sense.

MEDIRENT, a division of NORMA D.N.D. Products Pvt. Ltd. has taken a revolutionary & innovative step in starting rental services of medical equipments at Vikaspuri, New Delhi. **This kind of service is being done for the first time in India.**

According to Mr. Sunil Sharma of MEDIRENT, 'Under this novel Service MEDIRENT is offering expensive medical equipment on rent for home use such as Hospital Beds, Ripple Bed (Air Mattress), Oxygen Concentrator, Oxygen cylinder, C-PAP, Bi-PAP, Suction Machine, Wheel Chairs, Nebulizer, Walkers, Crutches, Bed Pans, Commode Chairs, BP Apparatus, etc.' the Rental Service starts from Rs. 20/=onwards and further depends on the medical equipment. For example, Wheelchair, which is important equipment; which can be used for the well being of the patient. A little bit of illness often leads to confinement & isolation. There are various conditions like paralysis, fractures & severe cases of arthritis where a patient is confined to the bed unnecessarily. People avoid buying wheelchairs for short duration use because of the psychological stigma attached to it. Renting a wheel chair is a wise decision on the part of the caregiver in all such cases. Wheelchair helps the caregiver take his loved ones for a stroll & makes it much easier to take the patient to the hospital or for any other errand. It is clinically proven that isolation & confinement of the patients due to illness & disability often leads to depression & slower recovery. Taking a patient on stroll makes him regain enthusiasm for life & **leads to faster recovery, further adds Mr. Sunil Sharma.**

Considering this as an essential and life saving service MTNL has cooperated by giving a special no. 25522552 for MEDIRENT
