

MRON "Flexi" FM Wireless Headset offers Freedom and Entertainment

MRON, one of the leading IT Hardware and Consumer Electronics company, has come out with its MRON "Flexi" Wireless Headphone, which is a ideal product for music enthusiast.

New Delhi, Delhi, IND, 2007-11-28 10:00:00 (IndiaPRwire.com)

MRON International Limited - The new FLEXI FM Wireless Headphone Hi-Fi offer first-class entertainment, outstanding sound quality and exceptionable comfort. And because its is wireless, the wearer's mobility around the home is almost unlimited giving people the freedom to unleash themselves from their PC as they listen to their digital music collection, Internet Radio or Wireless Net Chat. This new Flexi headphone is available in the cool high-gloss black in the market.

This model comes with FM radio and its Wireless reception helps the users to take out audio output from different sources such as full-channel TV sound, PC, game player, DVD player, VCD player, audio device, MP3 player, and CD player. A small transmitter that connects to the USB port on a computer, and the headphones, which include an integrated wireless receiver. With a range up to 40 meters (132 feet), allow people to experience crystal clear digital audio quality from virtually anywhere around the home. Being able to listen to music, enjoy games on your game console or watch television at any time of day or night - without bothering anyone - is no longer a problem, thanks to the MRON Flexi headphones.

This wireless headphone carries lot of features like, high sensitivity, interference resistance, strong signal, and outstanding performance, effective range over 40 meters, and reception beyond obstacle of wall, which helps the users to stay connected no matter where they are. The MRON Flexi headphone have a supra - aural, semi-open design and, at 180 grams, are comfortably light weight; the padded, self-adjusting headband adapts to the shape of your head for optimal comfort. As an added bonus, several headphones can be used simultaneously with the same transmitter - after all, sharing is twice the fun. The headset can be used as FM radio separately, search and look channels automatically and with integrated unique Wireless Monitoring feature you can place the emitter near the baby, old people and sick people who need care, and sound of the cared people can be heard with the receiver, for easy care. MRON Flexi headset comes equipped with the audio cable which enables to use this as a wired headphone also.
