New Delhi, New Delhi, IND, 2007-12-05 16:00:00 (IndiaPRwire.com)

**MRON** one of the leading IT Hardware and Consumer Electronics offering Premium Series in computer casings with ergonomic designs, good gauge and robust structure. These casings are complimented with a state of the art thermal control system and a strong 550 Watts power supply unit.

This new range includes **Ark, Skiff** and **Potter** pre-fitted with dual SATA and PATA connector and is designed to minimize the consumption of power. Besides this, it also handles the voltage fluctuations and power surges. The new Burn-In feature reduces the risk of damage to the expensive internal components of the computer by ensuring that in case of an eventuality it would cut off the supply to the motherboard. Made with high quality cold-rolled steel constructions, these cases are designed to be environmentally friendly as well as highly efficient.

The Thermal Control feature in the cabinets ensures a long life of the computer components by automatically maintaining its internal temperature with a selectable temperature operation in. The dual fan technology is necessary for the cooling of new generation processors, where more heat is delivered and also minimize dust infiltration at the same time.

**MRON** offers wide range of Computer Casing solution with front Audio and USB ports purely for Micro ATX and ATX. Besides Premium series, it's Semi-Premium, Classic and Regular series are also available in black and combination of black & silver color to cater to various customer segments and economic strata.

Mr. Naveen Garg, Director, **MRON** International Limited said '***We have always enjoyed a reputation for innovation and high performance Computer Peripherals & Consumer Electronic products that offer value to the customer and profit to the Channel Partners'***

**MRON** will build on this legacy by offering innovative, latest design, best quality products at competitive price and will market to the mainstream IT Hardware and consumer electronics retail community including regional and national chains, buying groups and specialty retailers.

**MRON** range of IT Hardware includes Cabinets, Speakers, Webcam, Keyboards, UPS, Headphones, TV Tuners, and Mouse and is offering this entire product line through its strong Network of Nine branch offices to the **MRON Valued Channel Partners (MVCP)**.

- END -
