Tushar Bhatia, an IIT Delhi alumnus, founder of Saigun Technologies (www.saigun.com) and chief architect and designer of EmpXtrack (www.empxtrack.com) has been invited by some US companies to present his Talent Management and Performance Management solution.

Noida, Uttar Pradesh, IND, 2007-12-07 17:07:29 (IndiaPRwire.com)

Tushar Bhatia, an IIT Delhi alumnus, founder of Saigun Technologies (www.saigun.com) and chief architect and designer of EmpXtrack (www.empxtrack.com) has been invited by some US companies to present his Talent Management and Performance Management solution. He will be visiting Chicago, Washington, New York City, New Jersey etc. during his visit.

The Performance Management and Talent Management are the two concepts that are hot at the table of HR Heads and CEOs worldwide. Most of the summits and conference about Human Resource in recent and forthcoming days center the theme 'Leveraging Technology for HR Effectiveness'.

India being a hub of software development due to its large talent pool and cost effectiveness is soon becoming first first choice for Human Resource Management software by US and UK companies. Many Indian software development companies that also has presence in Unites States have identified the need for Human Resource Management Software for managing employee performance and productivity and developed their unique solution to meet the challenges. EmpXtrack - a cost effective Human Resource and Talent management Suite has 18 module to address various HR Management challenges. EmpXtrack website is receiving hundreds of requests per month for information about Performance Management, Talent Management, Human Resource Information System, Global HR practices, Balanced Card Approach by Robert Kaplan, and many other areas of Human Resource Management.

During his visit, Tushar will present his innovative HR solutions on Performance Management, Talent Management, Human Resource Information System to CEOs and HR Heads of the companies. The key focus will be on the advantages of Software as a Service (SAAS) based solutions and ROI by implementing global HR Management practices. He will also be discussing various business proposals regarding implementation of Talent Management and Performance Management Software EmpXtrack (www.empxtrack.com).

To request any information regarding, Talent Management, Performance Management, Human Resource Software, Global HR Practices, Employee Self Service benefits, Software as a Service (SaaS) technology, you can fill the Request for information form (<http://www.empxtrack.com/contactUs/requestForInformation.html>) and Tushar or any of his team members will revert back to you in a short period of time.
