

F-Secure and Sony Ericsson partner to deliver Mobile Security for UIQ

The F-Secure Mobile Security 3.3 for UIQ combines an integrated antivirus and firewall.

Mumbai, Maharashtra, IND, 2008-01-24 10:09:55 (IndiaPRwire.com)F-Secure Corporation, the global leader in providing security as a service through mobile operators and Internet Service Providers, is today announcing the availability of its Mobile Security product for the UIQ platform. F-Secure and Sony Ericsson are partnering on supplying mobile security to Sony Ericsson's smartphones.

A trial version of the F-Secure Mobile Security(TM) 3.3 for UIQ will be available in selected Sony Ericsson UIQ devices. The companies will co-operate closely together in the area of mobile security to make sure that smartphones will continue to offer a safe and rich mobile computing experience.

As modern smartphones are extremely versatile and highly connected computing devices, they need the same kind of protection as PC's do. The F-Secure Mobile Security 3.3 for UIQ combines an integrated antivirus and firewall.

With similar solutions already available for S60 and Windows Mobile it completes the F-Secure offering of award-winning solutions for the most popular platforms in the rapidly growing smartphone market. The growing PC-like usage of smartphones will drive the services of the mobile internet and it is important for the industry now to put in place safeguards that will prevent a similar development of the threat situation as has been seen with PC's.

"We are very proud and happy about the UIQ product and the co-operation. Our complete mobile product range will enable us to continue our leadership in the area of mobile security. We have seen increasing demand for mobile security solutions also from mobile operators, who want to offer their customers a secure user experience in all situations and on all platforms. We have products for all the major open smartphone platforms at the moment, and we will continue to expand our security solutions offering to meet the growing needs in the market", says Samu Kontinen, Vice President, Mobile Solutions Business Unit, F-Secure.

The F-Secure Mobile Security 3.3 for UIQ will also be available for subscription through the F-Secure Mobile eStore at <http://www.f-secure.com/estore> .

About F-Secure Corporation

F-Secure Corporation protects consumers and businesses against computer viruses and other threats from the Internet and mobile networks. F-Secure's award-winning solutions are available as a service subscription through more than 160 Internet service providers and mobile operator partners around the world, making F-Secure the global leader in this market. The solutions are also available as licensed products through thousands of resellers globally.

The company aspires to be the most reliable security provider, helping to make computer and

smartphone users' connected lives safe and easy. This is substantiated by the company's independently proven ability to respond faster to new threats than its main competitors. Founded in 1988 and headquartered in Finland, F-Secure has been listed on the OMX Nordic Exchange Helsinki since 1999. The company has consistently been one of the fastest growing publicly listed companies in the industry. The latest news on real-time virus threat scenarios is available at the F-Secure Data Security Lab weblog at <http://www.f-secure.com/weblog/>.
