

Qualiteam Software adds Comodo's Hackerproof Service Which Revolutionizes E-Merchants' Ability to Establish Site Credibility to Improve Conversion

As a successful Comodo SSL partner, Qualiteam Software now introducing HackerProof to broaden their portfolio with conversion building solutions that increase eCommerce sales

Jersey City, , USA, 2008-04-16 21:21:13 (IndiaPRwire.com)Comodo, a global Certification Authority and leading provider of online Identity and Trust Assurance Management solutions, today announced that Qualiteam Software has started offering Comodo HackerProof, a new eMerchant service that drives visitor conversion by certifying that the site has been tested and meets Comodo's stringent security standards. Sites passing Comodo's vulnerability scans are certified to be free of security gaps and can display the HackerProof trust mark.

"We strive everyday to deliver business building services to our customers by seeking new technologies that have been proven to deliver results," said Alex Mulin, Director of Customer Relations department of Qualiteam Software. "The addition of Comodo HackerProof will offer our customers additional ways to increase their site conversion and site sales. This is why we are pleased that we can deliver this technology to our customers to help them achieve greater online success."

Qualiteam Software is a leading eCommerce shopping cart solutions provider offering eMerchants a complete portfolio of business critical PHP shopping cart software (X-Cart and LiteCommerce) and eCommerce services focused on flexible and highly configurable options. Qualiteam Software will provide this offer along with other Comodo solutions, including Comodo's industry leading SSL certificates - InstantSSL, Pro SSL, Premium SSL and SGC SSL solutions along with Comodo's HackerGuardian PCI vulnerability scanning services.

Comodo HackerProof service was specifically designed to drive conversion of site traffic by establishing a high level of brand credibility through a technologically advanced service and trust mark. HackerProof service provides:Technologically sophisticated vulnerability scanning service which tests sites for security holes to ensure site is not vulnerable to hacker attacks Improved site conversion capability with a patent pending TrustLogo that delivers easy access to online business credentials to create the trust that drives conversionSuperior site credibility through association with a highly trusted brand since the Comodo brand is recognized by 100 million people as a leading provider of online trust and security. With Comodo conferring anti-hacker certification on a site, visitors will be more likely to view these sites as trustworthy.

"The deployment of Comodo's HackerProof service will enable customers of Qualiteam Software to further enhance their online trust credentials and increase end-user confidence within online interactions", said James Langman, VP Business Development at Comodo. "The addition of HackerProof to their portfolio provides even more ways for Qualiteam Software to support the success of their customer base."

Qualiteam Software's participation in Comodo's Partner Program is based on Comodo's ability to offer the most comprehensive range of reseller management tools available, from SSL certificate management to server vulnerability management solutions with sophisticated systems designed to enable easy management and provisioning of eMerchant solutions.
