

Cincom Smalltalk Releases ObjectStudio 8.1 and VisualWorks 7.6

Seaside 2.8 Available

New Delhi, Delhi, IND, 2008-04-28 12:05:02 (IndiaPRwire.com)

Cincom Smalltalk announces the release of ObjectStudio® 8.1 and VisualWorks® 7.6, each with a number of significant improvements, including support for Seaside 2.8--the high-productivity web application development system. Seaside is open source and portable across multiple Smalltalk implementations.

Cincom ObjectStudio 8.1 is the first Vista-certified Smalltalk available. It now uses the industry-leading VisualWorks VM and has access to all of the standard VisualWorks components--including Seaside. Cincom has also updated its Sybase and ODBC support.

Cincom VisualWorks 7.6 has enhanced integration and revamped and refined browsing tools. Along with a greatly improved MacOSX VM, Cincom VisualWorks 7.6 also supports Microsoft Vista, OSX Leopard and MySQL, and includes a supported object-relational mapping framework (GLORP).
