

## Secure your online transaction from active hackers via SSLGenie

*Secure Socket Layer (SSL) is a protocol to secure online information while transferring from one user to others. In the present era hackers are always active to hack the information regarding online transaction code, information etc. because they now every single person is not using SSL certificates so it is easier to hack information from there.*

Noida, Uttar pradesh, IND, 2008-05-08 12:11:28 (IndiaPRwire.com)

The internet is rapidly increasing at an annualized rate of 18% and now has one billion users and the second billion users are going to add within 10 years i.e. a drastic change in the internet world. E-Commerce is also growing rapidly increasing and the sale is also increasing because every firm is going online because the numbers of users and business is increasing exponentially. Customers are going online purchase because to save their costlier time and investment also while going to a shop. Every clientele wants to secure their transaction when buying a product via online because they are also aware of hackers who are always ready to hack the information. So the customers are using to buy products from there that have SSL certified from SSLGenie due to reason that it is Trusted Global Certification Authority for SSL.

The most important feature is that you have nothing to pay extra, only pay the cost of the product. Today E-commerce websites need full security to enhance their business and to attract valuable customers because every customer before buying a product wants security about the online transaction which is the most important factor. SSLGenie provide you full warranty that no one ever can hack any information because we provide you 256 bit encryption which is the most secure one and hacking information from 256 bit encryption is not easy task or impossible one. SSLGenie provide you two types of SSL i.e. Flash SSLGenie or Premium SSLGenie depending on your requirement. The price and the features of these two products are totally different. As a customer you can choose one as per your requirement and enhance your business and transactions also.

SSLGenie provide you the feature to renew your SSLGenie certificates as per your requirement. The validity period of SSLGenie certificates is one year (365 days), two years (730 days), three years (1095 days) or more from the date of issuance and is detailed in the relevant field within the certificate. SSLGenie is the best to secure online transactions and also information.
