**Stellar Information System Ltd. introduces SQL Recovery software.** The data recovery company, which has achieved its customer's satisfaction up to a peak level through its topmost data recovery services and products, has now come up with new software which can recover and repair corrupted Microsoft SQL server Database file. Until now Stellar is known for its quality products and this MS SQL Repair application is in the line of its next achievement as it can restore the damaged .mdf files for instances like Virus attack, system shutdown, and media read error and so on. This software would prove as a boon to all those who are facing data loss due to SQL database corruption.

Stellar Phoenix MS SQL Data Recovery software-launched by Stellar today, is the best solution for repairing corrupted MS SQL server databases. The repair software that are already available in the market for repairing databases on other platforms like MS Access are gaining much popularity for their tremendous performance and now this MS SQL Repair software is an addition to them. It has been developed seeking the comfort I zone of the users during its use and very well adapted to scan thoroughly and completely the corrupted .mdf files in order to extract as much data as possible. The user will easily discover the original data deleted or modified after the use of this software and also is safe and non-destructive.

The key features of the product are listed below: Recovers Tables, Views and Rules that has been there in the database. Recovers defaults. All the user defined functions and data types are recoverable. An interactive user interface. The stored procedure can also be retrieved. Works well with Windows 2000, 2003, XP and Vista. Compatible with MS SQL Server 2000 version. Can recover indexes and constraints.

This MS SQL Repair software goes good repairing the MS SQL server databases after any instance of database corruption and with any file version of Windows and thus acting as a complete solution for your corrupted SQL databases.
