Chennai, Tamil Nadu, IND, 2008-05-28 15:41:36 (IndiaPRwire.com)

Young Scientists India (www.theyoungscientists.in) announces availability of "The Young Scientists" series 73-82 , an innovative children's science magazine for academic year 2008-2009.

Published from Singapore for last 8 years and enjoyed by lakhs of children, it illustrates science, health and environmental concepts through colourful and conversational comic style stories. The magazine content is customised at 3 different levels so that a child can choose his level depending on his age and class.

Company's CEO Mrs Radha Shridharan says 'Our mission is to create a next generation which is innovative and creative in all walks of life. In future, India needs more innovation and creativity to compete in the global market. Our comics instill that spark of creativity at an early age due to our unique presentation style. Though the general theme revolves around science, we also include stories about great scientists, science fiction, in context help with english vocabulary, brain teasers, experiments and activities to inspire innovation. Children who subscribe eagerly look forward to every issue of it. It can also be a useful teaching aid for teachers. The comic strips can be viewed online as well.'
