Gurgaon, Haryana, IND, 2008-05-31 15:00:31 (IndiaPRwire.com)

Stellar Phoenix Photo Recovery Software recovers digital photo, images, picture, audio, video files from all external storage devices such as camera cards and USB devices & hard drives and logical drives.

Stellar has come up with an advantage in the name of Stellar Phoenix Photo Recovery software for those users who want to live their memorable days forever. Till now Stellar is known for its digital photo recovery product called Stellar Phoenix Digital Media Recovery software which could perform photo recovery from memory card and digital camera but now this advent is an enhancement in the features of the same as it could recover all your media files and digital photographs from hard drives also which have been operated on Windows supported systems. This is an updated photo recovery software with lots of added advantages and will surely accelerate its popularity among users. This software can recover any of the lost or deleted digital pictures and media files from any of the removable media and digital card.

All of the photos which have got lost due to either accidental deletion or formatting of the media can be recovered using this photo recovery utility. This photo recovery software has undergone many tests under expert's sight and has been specially designed to tackle any of the photo recovery difficulty for Windows in the cases like:

- Formatting the media.
- Unintentional deletion of any of the digital pictures and media files.
- Corruption in the media due to turning off the camera while some read/write process was on its way.
- Have moved your card or media between various computer units and now it is corrupted.

The key features of the software are listed below:

- Support to all popular camera, audio and video file formats.
- A thorough scan of the affected media.
- Support to all type of hard drives and logical drives.
- CD photo recovery is also supported.
- Working well with all the latest file versions of Windows like Windows 2000, 2003, XP and Vista.
- Enhanced preview of the files.
- Recovery in any of the case of image loss.
- An interactive and user friendly user interface.
- Any of the images is recoverable.
