

GainSpan Corporation in partnership with S M Electronic Technologies

Bangalore, June 17, 2008: GainSpan Corporation, an Intel spin-off and a technology innovator and leader in wi-fi semiconductor and software solutions today announced that it has appointed S M Electronic Technologies to be a manufacturer's representative and distributor in India for all of its solutions.

Bangalore, Karnataka, IND, 2008-07-17 15:02:11 (IndiaPRwire.com)

Announcing the relationship Vijay Parmar, CEO, GainSpan, said, 'The solutions GainSpan has developed are extremely relevant to India and going by the current market trends has immense market potential as well. We knew that a distributor who has the knowledge, reach and resources is key in our being able to penetrate this large and complex market. A leading player in this space with a track record, S M Electronics brings all the above and more to the table and I keenly look forward to working with them in bringing wi-fi sensor networks to life in India.'

According to Ramachandran Murthy, Director, Business Development, S M Electronics,' we are excited to be working with GainSpan to help bring industry leading technology to the Indian market. It highlights our continued focus on delivering innovative products. Our customers in India will greatly benefit from the GainSpan solution that consume low power and is designed to support broad range of sensor applications'.

The GainSpan GS1010 SoC is an ultra low-power System-on-a-Chip (SoC) solution that leverages the widely deployed Wi-Fi (IEEE® 802.11) network. By utilizing this infrastructure, people can deploy sensor systems using standard tools and knowledge base, and seamlessly integrate with existing management systems, including enterprise network management systems, as well as existing SCADA industrial and building automation systems.

About S M Electronics

Founded in 1990 S M Group is head quartered in Bangalore which is considered the '**Silicon Valley of India**'. SMET has nationwide presence in India. It has wide customer base & excellent reach to all segments of Electronic Industries namely Automotive, POS-Terminals, Power Electronics, Instrumentation, Telecom, White Goods, Defense and Aerospace. Overall SMET provides an Innovative technical and sourcing solution.

About GainSpan

GainSpan is a technology innovator and leader in Wi-Fi semiconductor and software solutions that provide years of battery life for sensors and other connected devices. GainSpan brings Wi-Fi sensor networks to life with breakthrough technology that leverages the ubiquitous Wi-Fi infrastructure and enables Wi-Fi devices to run up to 10 years on an AA battery. GainSpan solutions enable people to save money, save energy and work smarter. For more information, visit www.gainspan.com.
