

ARMS®V2 Aviation InfoTech suite powers newest regional startup, Air Pegasus' launch

Sheorey Digital Systems Ltd. (SDS), is delighted to be the Aviation InfoTech Solutions provider to Air Pegasus, as the newest airline on the Indian aviation firmament launched commercial operations on 12th April 2015, from its base at Kempegowda International Airport, Bengaluru.

Bengaluru, Karnataka, April 20, 2015 /[India PRwire](#)/ -- **Sheorey Digital Systems Ltd. (SDS)**, is delighted to be the Aviation InfoTech Solutions provider to **Air Pegasus**, as the newest airline on the Indian aviation firmament takes to the skies starting 12th April 2015, from its base at Kempegowda International Airport, Bengaluru.

Air Pegasus chose to go with **ARMS® V2 (Aviation Resource Management System)** suite for automating its complete operational processes which will enable the airline to exercise tight control over direct operating costs, ensure proactive flight safety and achieve complete statutory compliance from day-one.

Vivek (Vicky) Sheorey, Managing Director & CEO of **Sheorey Digital Systems** whilst congratulating the **Air Pegasus** leadership team on achieving operational launch, asserted that the early decision to deploy the complete **ARMS® V2** suite will help **Air Pegasus** address the most critical challenge faced by airlines today viz. maintaining profitability without compromising quality and flight safety, while simultaneously ensuring high operational efficiency.

The **ARMS® V2** suite comprises over a dozen applications and for **Air Pegasus** will help manage the Network Planning & Scheduling, Crew Management, Flight Operations, Flight Dispatch, Flight Data Analysis & Safety and Maintenance & Engineering functions.

A cost-effective enterprise-class solution, **ARMS®** is a seamlessly integrated application suite deployed as a turnkey project implementation; it is completely customizable and configurable to specific requirements thereby offering a bespoke solution to Airlines & Air Operators, at a very affordable cost-of-ownership. Having been deployed with nearly 40 operators worldwide, it is also a proven, robust and stable System backed by prompt & reliable technical support.

Notes to Editor

About SDS:

Sheorey Digital Systems Ltd. (SDS) is an ISO 9001:2008 & 27001:2005 certified, established Indian InfoTech company specializing in Aviation and Information Management domains. SDS strives to provide radically efficient and cost-effective software solutions for the Air Transportation industry.

SDS has pioneered the development of a highly integrated, flexible and scalable enterprise-class software solution exclusively for the Air Transportation industry viz. ARMS® (Aviation Resource Management System). Offered both as a seamlessly integrated suite or modular standalone applications, ARMS® is helping Air Operators worldwide, successfully cope with uncertain and highly volatile bottom lines.
