

BWIR Attains Microsoft Gold Certified Partner Status

In recognition of core competency in Custom Solutions (Web Development Specialization) and SOA/Business Process Solutions

Chennai, Tamil Nadu, November 13, 2008 /[India PRwire](http://www.indiaprwire.com)/ -- Barry-Wehmiller International Resources (BWIR), pioneers in the creation and development of solutions integrating the key elements of Enterprise Consulting, Engineering and Information Technology, have recently achieved the Gold Certified Partner status within the Microsoft Partner Program with core competencies in Custom Solutions (Web Development Specialization) and SOA / Business Process Solutions.

Commenting on this highest level of competence and expertise certification, Mr. Senthil Kumar, Vice President and Partner of India Operations for BWIR said, "This reflects our commitment to deliver end-to-end web based business solutions to our customers across the world. The certification reflects the people capability faith we repose in our employees and help us raise the delivery standards and meet customer expectations".

Adding to this, Mr. Vasant Bennett, President and Managing Partner of BWIR said, "The Gold Partner Certification is a mark of excellence and recognition of BWIR's commitment to providing leading-edge solutions and assuring the highest levels of quality and service to all our clients; and forms part of our core strategy to set the benchmark as a leading global player in the engineering and business software solutions domain"

This status has boosted our business plan; the current business trend requires companies to be both solution providers and expert advisers.

BWIR has achieved Web Development specialization in Custom Solutions Competency which is primarily for partners who develop with Visual Studio 2008, Visual Studio Tools for Office, Microsoft SQL Server, Windows Server 2008, Microsoft BizTalk Server, Windows XP, Windows Vista, and the 2007 Microsoft Office system. Web Development focuses on delivering Web-enabled deployment solutions required in organizations that wish to operate and transact through the Internet using Visual Studio, ASP.NET, IIS, Windows Server 2003, and SQL Server. The Business Process and Integration Competency is designed for technology partners with proven expertise in deploying business to business solutions, Enterprise Application Integration(EAI), business process integration and management.

Established in 2003, The Microsoft Partner Program recognizes the expertise and rewards for the impact the partners create in the technology marketplace, and delivers tools and resources to help businesses become profitable regardless of its size or focus.
