

AV-TEST Certifies eScan Internet Security Suite as TOP Rated Product

eScan's Internet Security Suite for Windows received the coveted AV-TEST certificate as Top Rated products among its peers. The test was conducted in May and June 2017 period for Windows based security software for home users.

Bengaluru, Karnataka, July 27, 2017 /[India PRwire](#)/ -- **eScan's** Internet Security Suite for Windows received the coveted AV-TEST certificate as Top Rated products among its peers. The test was conducted in May and June 2017 period for Windows based security software for home users.

The results showed that eScan Internet Security Suite, successfully protected against zero-day malware attacks and real world threats in the test conducted by AV-TEST. eScan's R&D team strives hard to keep ahead of the fast changing cyber threat landscape and putting relentless efforts towards development of innovative and state of the art technologies to provide real time protection for its users.

eScan and its various futuristic technologies have consistently performed the best in detecting and protecting users from downloading/installing rouge software. The tests conducted by AV-Test in May and June, have described eScan as one of the most user-friendly and effective protection providers for Windows OS Home Users. eScan has also stood out on the basis of its added features offered in the product and usability.

eScan Internet Security Suite with Cloud Security for Home and Small Office Edition is a specially designed security solution that provides real-time protection for computers and laptops from growing cyber threats, such as Viruses, Spyware, Adware, Key loggers, Rootkits, Botnets, Hackers, Spam and Phishing. eScan ISS protects a user's personal information and ensures safe computing environment to the whole family when browsing the internet, shopping online, performing online transactions or social networking.

Assessment of tests was on 3 factors and eScan scored the highest with the below:

- **Protection:** Protection against malware infections (such as viruses, worms or Trojan horses)
- **Performance:** Average influence of the product on computer speed in daily usage
- **Usability:** Impact of the security software on the usability of the whole computer (lower values indicate better results)

On receiving this award, **Mr Govind Rammurthy, MD and CEO, eScan** said, "*It reinstates our faith in building state of the art security solutions at par with global peers and also successfully stands the stringent tests conducted by AV-Test to qualify as the Top Rated Product. Our commitment for providing a fast & secure online experience drives our passion to continuously enhance our product and its features to defend against the growing cyber threat*".

An advanced security solution, eScan Internet Security and Total Security Suite offers total protection against Internet threats, thereby improving the overall performance of the computer and ensuring integrity of data. This specially designed security solution ensures safe computing environment while browsing Internet, shopping online, performing online transactions, or social networking. The secured computing environment provided by this award winning product can be experienced from the below link:
