

Venture Infotek takes the lead in Re-Defining Disaster Management

Announces Capex investment of Rs. 100Mn and operating budget of Rs. 40Mn each year

Mumbai, Maharashtra, September 5, 2008 /[India PRwire](#)/ -- Today as most companies are gearing up to avoid any disaster. Venture Infotek, India's leading transaction processing and knowledge management company announced that it is in a position to meet up the challenges when facing with Disasters like Monsoons, Earthquakes, Tsunami, Fire, or Civil commotion.

Venture Infotek which has its Disaster Recovery Site (DRS) at Bangalore, ensures business continuity for its customers and business partners, in case of any disaster or major information service disruption at its primary data centre in Mumbai.

Announcing this facility, Mr. Piyush Khaitan, Managing director of Venture Infotek said, "This Disaster Recovery Center of Venture Infotek provides real time comprehensive Business Recovery Service to the customers of Venture Infotek, which is essentially needed in today's competitive business environment. This Disaster Recovery Site has been built in Bangalore, which is in a different seismic zone. Both, the primary and secondary data centers are mirror images of each other with real-time data replication enabled between the two sites. In addition, the well-defined disaster management process involves monitoring, analyzing and identifying an emerging crisis and taking necessary steps. Venture Infotek is geared up to respond to the crisis and execute the defined action on time."

The Disaster Management solution was implemented by IBM for Venture Infotek, and entailed a capex investment of Rs 100 Mn, besides an operating budget of Rs. 40 Mn each year. Venture Infotek has in effect replicated its entire data center facility at Bangalore as a 'Hot Standby'. On-line data replication is done using Veritas on-line replication technology. This ensures that the servers at the primary site, and the back-up site are always in synch. The two sites are linked by leased lines from multiple service providers, and using Juniper Networks' Peribit solution, provides a 40 mbps effective data throughput. The disaster recovery center has payment gateways linking it to 24,000 banks globally to ensure continued transaction authorization and processing.

This complex solution was implemented over a period of 6 months, and is now an international reference site for such a complex implementation. Venture Infotek tests this site on a regular basis, by doing a cut-over exercise, and operating exclusively from the Back-up center to ensure its effectiveness

The Disaster Management team of experts ensures that all the areas of Emergency Management, right from installing a public address system for mass communication to arranging for radio and television access for quick information, and from maintaining emergency cash balance to enlisting emergency numbers of various services are adequately covered. Venture Infotek has designed an explicit communication policy for its customers, vendors and employees working onsite and offsite for communication during and post-emergency. Apart from these steps, Venture Infotek has also arranged dedicated lines for incoming calls and hotline between its various branches, besides stocking spare mobile handsets, chargers and batteries.

"Venture Infotek's mission of providing e-infrastructure through a suite of on-line, fully integrated set of products, services, and widely accessible shared e-infrastructure has been accomplished by easing of the panic of its clients and end customers through it Disaster Recovery Site", added Mr. Khaitan.

Venture Infotek caters to 40 leading Indian institutions from the Banking & Corporate sector like Axis Bank, IDBI Bank, Bank of India, Bharat Petroleum Corporation, Indian Oil Corporation etc.
