

## **NEC India holds a three city roadshow to showcase its Trustworthy Display Solutions to enable the Enterprises**

*NEC India launches MultiSync X461UN LCD Displays ideal for video wall applications that have the thinnest bezel in the world*

New Delhi, Delhi, December 14, 2009 /[India PRwire](#)/ -- NEC India Pvt. Ltd, a leader in commercial display solutions space organized a three city road show to display its enterprise technology products. The products were demonstrated during the roadshow in three cities - Bangalore, Mumbai and Delhi. During the roadshow NEC India announced the launch of it's world class, multisync LCD monitor - X461UN best suited for video wall applications required in broadcast purposes, corporate displays, control/monitor room applications, customer experience centers, Retail Malls etc. The 3 city Roadshows were attended by key System Integrator Partners and End Customers.

NEC India's end-to-end digital signage solutions, all available under one brand (hardware, software to the broadband distribution) including "PANEL Director", a digital signage solution in India Market were also on display, The "PANEL Director" enables display of eye-catching advertisements and in-store promotions, breaking news and announcements and up-to-the-minute timetables and schedules. This roadshow had several other products/solutions catering mainly to the retail and hospitality sector including the recently launched short throw NP500WS & NP600S LCD Projectors, NP4100 & NP4100W DLP projectors to name a few.

**On this occasion, Rajiv Bhalla, Country Head - Sales & Marketing, NEC India** said, *"At NEC we believe in our commitment to empower people and society through continuous innovation in every area of our businesses. The recent launches are in sync with this thought. Our products are endowed with benefits that reduce the total cost of ownership, offer the highest-quality & environment friendly components to help "be green" & ergonomic features to maximize viewing comfort."*

The 46" NEC MultiSync X461UN is sure to revolutionize LCD video wall applications. Its ultra-narrow bezel allows a screen-to-screen distance between two neighboring displays of mere 7.3mm, a near 450% improvement to NEC's previously revolutionary 33mm MultiSync 20 Series displays. It is of huge utility in retail malls, customer experience centers, broadcasting studios, control rooms & can replace conventional video display cubes that consume more energy and are expensive.

**Sanjay Dhuria, Country Head -Display Product and Solutions, NEC India** said, *"The NEC X461UN Monitor offers world class picture quality & ultra narrow bezel that enables an extraordinary visual experience that makes it ideal for digital signage & broadcast applications. Its design makes it highly reliable and it incorporates a professional grade panel with an inbuilt expansion slot enabling convenience & flexibility. It can be used continuously in a 24/7 environment! "*

The display, can be deployed in video wall matrices of up to 10x10 (100 displays), creating a total surface area of approximately 645 sq ft. The barely discernable transition gap between displays ensures a homogenous picture across the matrix.

*Salient features of the MultiSync X461UN:*

- Professional-grade LCD panel and components
- 1360 x 768 WXGA native resolution in true 16:9 aspect ratio, maximum brightness of 700 cd/m2 and typical contrast ratio of 3000:1
- Ground-breaking ultra-narrow bezel of 7.3 millimeters (screen-to-screen)
- TileMatrix™ technology (up to 100 displays)
- Built-in expansion slot
- Optional SpectraView™ Color Calibration Solution

- Network Control and Communication
