Gulf Helicopters Company selects ARMS® on the TAB Electronic Flight Bag solution from Sheorey Digital Systems

Aviation InfoTech solutions provider, Sheorey Digital Systems Ltd. (SDS), today announced the confirmation of an order from the Gulf Helicopters Company (GHC) for its latest application and EFB (Electronic Flight Bag) Solution: ARMS® on the TAB

Bengaluru, Karnataka, June 6, 2013 /India PRwire/ -- Aviation InfoTech solutions provider, Sheorey Digital Systems Ltd. (SDS), today announced the confirmation of an order from the Gulf Helicopters Company (GHC) for its latest application and EFB (Electronic Flight Bag) Solution: **ARMS® on the TAB**.

With this acquisition, Doha, Qatar based GHC's Helicopter Operations will benefit from a completely integrated EFB solution. **ARMS® on the TAB** is an integral component of the ARMS®V2 (Aviation Resource Management System, Ver. 2.0) application suite from SDS and many of its components are already in use at GHC. This affords GHC a significant advantage of having an EFB solution that is fully integrated with the back office and Ops systems.

Commenting on the development, MD & CEO of Sheorey Digital Systems, Vivek Sheorey expressed his deep pleasure on the choice exercised by GHC and added that the adoption of **ARMS® on the TAB** by GHC is a logical extension of the ARMS®V2 deployment and adds tremendous value to GHC's offshore operations by providing anytime-anyplace accessibility as a fully mobile application.

Reflecting the growing trend towards adoption of Tablet devices across Air Operations and Engineering, **ARMS® on the Tab** delivers the attributes and values of the versatile ARMS® V2 application suite, via any user-defined Tablet platform.

Notes to Editor
