

Public Soft Launches Unique Pocket LED projectors

Public Soft Launched a unique Pocket Size Projector based on LCoS Technology. The lamp life is usually 5-8 times more than traditional halogen lamps used in CD and DLP projectors

Gurgaon, Haryana, March 8, 2010 /[India PRwire](http://www.indiaprwire.com)/ -- **Public Soft** has launched **MP 220 LED Projector** based on LCoS Technology and are leaders in the market for this range of Projectors. MP 220 is based on LCOS technology (Liquid crystal on semiconductor) and uses Himax Optical Engine and LED lamp which has more than 20000 hours of life.

Though the projector is very small and weighs only 200 Gms, yet it has functionality of any large sized LCD projector. It can be connected to PC, laptop, DVD player or Set Top box.

MP 220 has 1GB built in memory and you can save all your presentations or videos in the projector and you do not even need to carry your laptop for presentations. The memory can be increased to 32GB by using micro SD card slot of the projector using commonly available Micro SD cards.

Lot Corporates like Maruti Suzuki, Jaypee Group, IGL etc., army units, Educational institutions like IIT etc. have already procured these type of projectors from us.

These projectors are very eco friendly and consume only 15W powers and are poised to replace the traditional LCD/DLP market.
