

Unitech Wireless Selects Telcordia Prepaid Mobile Services Platform for Pan-India GSM Network to Serve Millions of Subscribers

Telcordia(R) Real-Time Charging Solution Enables State-of-the-Art Communications Network to Support Advanced Wireless Voice and Data Services across India

New Delhi, Delhi, July 1, 2009 /[India PRwire](#)/ -- Telcordia (www.telcordia.com), a global leader in the development of IP, wireline, and mobile telecommunications software and services, today announced that it has been selected by Delhi-based Unitech Wireless as part of its build-out of a pan-India GSM network to serve millions of subscribers. The Telcordia® Real-Time Charging solution will enable Unitech Wireless to reduce time-to-market in offering sophisticated and innovative services for advanced wireless voice and data, in all 22 circles across India.

The Telcordia Real-Time Charging solution offers Unitech Wireless a flexible, affordable convergent charging solution that can handle the demands of prepaid-postpaid, voice-data-content, and circuit-packet convergence. While reducing time-to-market for new advanced services, the solution will also help Unitech Wireless reap major cost savings and drive revenue by consolidating charging on a convergent platform while increasing customer loyalty, usage and retention.

"India continues to experience exceptional rates of subscriber growth and communication service providers (CSPs) will look to attract new subscribers and increase service use to boost revenue by differentiating their service offerings," said Anuj Kapur, Country Head -- India, Service Delivery Solutions, Telcordia. "This marks the fourth CSP in India to select Telcordia for real-time charging and is indicative of the value and much needed service differentiation that Telcordia brings CSPs in a highly competitive market by enabling value-added, personalized and interactive services."

"The order placed with Telcordia is one of the major orders for equipment and solutions placed by Unitech Wireless this year. Leveraging existing competencies in the infrastructure and services space will be central to our strategy to reduce time-to-market and ensure a swift and cost-efficient rollout of our services in the Indian market," said Rohit Chandra, Chief Operating Officer at Unitech Wireless.

Independent of network equipment suppliers, Telcordia provides CSPs, such as Unitech Wireless, with solutions that enable rapid scalability of large networks as well as reduce integration costs and complexity with an open, flexible convergent charging platform.

Telcordia Real-Time Charging makes it easy to create and deploy customer-specific rules for rating, discounting, promotions, and settlements, and enables CSPs to differentiate their service offerings and personalize the mobile experience for its customers.

Building off its ongoing relationship with IBM, Telcordia built its comprehensive solution on the IBM BladeCenter and engages IBM to provide local support. The Telcordia solution also uses Telesoft Technologies OKEFORD media platform technology.
