*The new Siemens Gigaset C 360 phone is of superior quality and easy-to-use. Equipped with cutting-edge technology, this cordless phone model from Gigaset Communications is elegant and energy-efficient. It is ideal for use in households and small offices with its convenient features.*

New Delhi, Delhi, January 13, 2010 /[India PRwire](#)/ -- **The new Siemens Gigaset C 360 phone is of superior quality and easy-to-use. Equipped with cutting-edge technology, this cordless phone model from Gigaset Communications is elegant and energy-efficient. It is ideal for use in households and small offices with its convenient features.**

The Gigaset C360 is the ideal cordless phone for consumers who place importance on quality and ease of use. The elegant handset in a black and silver design offers everything needed for convenient use at home. Each model has an illuminated display and a phonebook for up to 40 names and numbers; the last 10 dialled numbers can be called using the redial function. Display and keypad are illuminated, and the hands-free function ensures even greater mobility for cordless calls.

Cutting edge ECO-Technology saves energy and reduces radiation

With the new ECO WDCT technology the Siemens Gigaset cordless phones use up to 60 %less energy in comparison to former, conventional handsets. In addition the phones offer the variable reduction of radiation. When a single handset is docked and charging, the transmission power of the base stations is reduced nearly to zero. Depending on the distance to the base station the handsets automatically reduce transmission power. For example, transmission power is just 15 percent at a distance of eight meters.

Gigaset Communications GmbH is one of the world's largest manufacturers of cordless phones and the clear market leader in Europe for DECT phones. With its headquarters in Munich, the company develops, manufactures and distributes high-quality products under the brand Siemens Gigaset. Its portfolio includes fixed-network phones, Voice over IP devices, software solutions and home media products. The primary production site is in Bocholt, Germany, where the Gigaset products are manufactured under the most stringent quality and environmental standards. Gigaset Communications is a licensee of the Siemens trademark. Gigaset Communications GmbH is an ARQUES Industries AG (<http://www.arques.de>) company.
